Portfolio: ***https://energizecodetech.netlify.app/portfolio***

PROFESSIONAL SUMMARY

Full-Stack Web Developer with 3+ years of experience building secure, scalable, and production-ready web applications using PHP, MySQL, JavaScript, and Bootstrap. Founder of Energize Code Tech, delivering authentication systems, admin dashboards, payment-integrated applications, and business platforms such as VTU systems, e-commerce platforms, and restaurant ordering websites. Strong expertise in backend logic, database architecture, REST API integration, and secure authentication systems.

TECHNICAL SKILLS

Programming: PHP, JavaScript, HTML5, CSS3

Frameworks & Libraries: Bootstrap, Laravel (Basic)

Backend: Authentication Systems, Role-Based Access Control, Session Management, REST API Integration

Database: MySQL (Schema Design, CRUD Operations, Query Optimization)

Security: Input Validation, SQL Injection Prevention, Secure Sessions

Payments: Paystack, Flutterwave API Integration

Tools: Git, GitHub, VS Code, XAMPP, cPanel

PROFESSIONAL EXPERIENCE

Founder & Lead Full-Stack Developer | Energize Code Tech | Jan 2026 – Present

- Founded and manage a web development brand delivering custom web applications.
- Built recruitment systems with admin approval workflows.
- Integrated Paystack payment gateway with secure transaction verification.
- Developed authentication systems with role-based dashboards.
- Designed optimized MySQL database schemas for scalable applications.

Frontend Web Developer | Mzinet Computers | Sept 2023 – Present

- Developed responsive business websites using HTML, CSS, JavaScript, and Bootstrap.
- Improved UI/UX performance across mobile and desktop.
- Maintained and updated multiple client websites.

SELECTED PROJECTS

VTU (Virtual Top-Up) Web Application

- Built platform for airtime and data purchases.
- Integrated secure payment verification and transaction logging.
- Implemented wallet balance management and transaction history.

Restaurant Ordering Website

- Developed online restaurant ordering platform.
- Implemented menu browsing, cart system, and order processing.
- Created responsive UI for mobile ordering.

E-Commerce Platform

- Developed online store with product listing and checkout.
- Implemented cart functionality and order management.
- Built admin interface for managing products and inventory.

Secure Authentication System

- Built login and registration system using PHP sessions.
- Implemented role-based access control.
- Added protection against SQL injection and unauthorized access.

Recruitment & Payment Processing System

- Developed recruitment portal with admin approval workflow.
- Integrated Paystack for application payments.
- Implemented downloadable receipt generation after payment.

EDUCATION

B.Sc. Biological Sciences | Federal University of Agriculture, Abeokuta | 2023
